# STRONGHOLD®

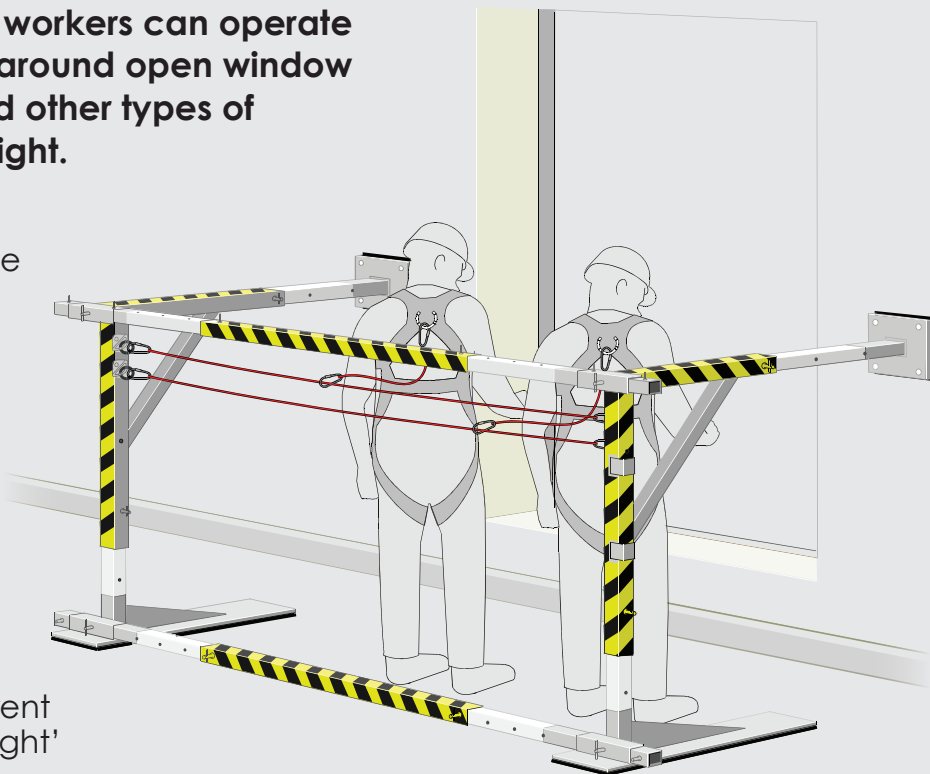

## Fall Restraint / Barrier System

With the light weight and robust Stronghold® Fall Restraint System workers can operate safely and securely around open window spaces, lift shafts and other types of apertures, at any height.

The Stronghold® also provides a highly visible barrier, preventing others from getting close enough to the opening to fall.

### NO MORE SCAFFOLD

Remove the need for scaffold and the inherent costs and 'work at height' safety issues.

- Conforms to BS EN 795 B: 2012
- Supports 2 fitters
- Anchor window frame
- Increase safety
- Increase professionalism
- Reduce scaffold costs and setup times
- Light to transport requiring minimal storage space
- Only 5 minutes to erect
- Fully adjustable up to 3.5m wide

### SIMPLE TO USE

[www.stronghold-fall-restraint.com](http://www.stronghold-fall-restraint.com)

Stronghold® maximum dimensions: Width: up to 3.5m.  
Depth: up to 1.6m. Height: up to 2m from work area floor level.

Protected by patent.
