

Keeping you and your workers safe at height

The Stronghold® Fold Away

The Stronghold Fold Away is a fast erect mobile anchor point and barrier system which is setup inside the building around an opening to be worked on, around or from. With the safety net provided the Stronghold FOLD AWAY instantly provides a highly visible barrier around opening at height, preventing the public or other trades people from getting close enough to the opening to fall.

Anchor points fitted to the Stronghold FOLD AWAY side units provide an attachment point for two workers to attach their harnesses to, protecting them from a fall in work restraint or fall arrest mode and allows both operatives to move freely and independently of each other.

The Stronghold has an extra set of anchor points that can be used to attach tools or other object to the Stronghold via load straps, preventing these items from falling and causing damage and injury.

Specifications

Minimum width: Approx. 750mm (dependant on horizontal life line and ratchet minimum width)
Maximum width: 3700mm
Minimum height: 1720 mm to top of wall plates
Maximum height: 1985mm to top of wall plates
Usage maximum: Maximum of 2 persons.
Weight: Each Side Unit weighs approx. 13Kg. Total set weighs approx. 30Kg
Conforms to: EN 795 B: 2012, TS 16415: 2013. ANSI Z359.1 : 2007, AS/NZS 5532: 2013. Meets OSHA requirements.

Stronghold® FOLD AWAY

- ✓ Designed for all construction and building maintenance work at height, by industry sectors such as: Fenestration, Industrial Rope Access, Facilities management and building maintenance, Window cleaning, Roofing, Building facades, Elevators, Surveying.
- ✓ Ideal for work on Schools, Hospitals, high rise offices and residential buildings, Hotels, Listed/Heritage buildings, buildings near external obstacles such as rivers or railways where scaffold can not be used.
- ✓ Works in line with HSE Work at Height Regulations 2005.
- ✓ Free standing, the Stronghold FOLD AWAY does not require any fixings meaning that no damage is caused to the walls or floor. Holes are available in the wall plates allowing the Stronghold to be bolted to the wall if required.
- ✓ No tools are required for setup.
- ✓ Each side unit of the Stronghold FOLD AWAY folds down to approximately 1600mm x 150mm x 300mm weighing little over 13Kg per side unit.
- ✓ Provides certified anchor point for two users.
- ✓ The Stronghold FOLD AWAY can be setup in under 5 minutes, by one person.
- ✓ The Stronghold FOLD AWAY can be used for work restraint and fall arrest.
- ✓ Simple yet effective accessories are available for the Stronghold FOLD AWAY such as the safety net. The net is fitted around the three open vertical sides enclosing the Stronghold FOLD AWAY, effective when being used in a common area.
- ✓ Easy to store, transport, set up and use.

Product Summary

- › The Stronghold provides a highly visible barrier around the opening preventing other trades people or the public from getting close enough to the hazard to fall
- › The Stronghold weighs little over 30Kg but has passed the British Standard BS EN 795 B:2012 and TS 16415: 2013 where it was required to support 1.9T. It did so without any signs of permanent deformity
- › The Stronghold also passed Standard tests (carried out by SATRA UK) for Australia, Canada and the USA, also meets OSHA requirements
- › The Stronghold System is manufactured in the UK to the highest standards by an ISO 9001: 2008 national Manufacturer
- › Certified anchor points easy to visually inspect, unlike fixed eye bolts, single point anchors.
